

## Message from the BBC to NRPSI Registrants

The BBC is looking into the importance of interpretation in the NHS and other public services.

Their Health Correspondent [matthew.hill@bbc.co.uk](mailto:matthew.hill@bbc.co.uk) would be very keen to hear of any case studies.

Send through any information you believe would be valuable for Matthew.

In particular, Matthew would like to talk to families who have had to rely on young children to interpret outpatient and inpatient sessions with medical staff; can you help point him in the right direction?

Please ensure emails sent to Matthew are titled 'Interpretation'
